PRESS RELEASE

TRADEGUIDER LAUNCHES LEASE PROGRAM FOR ITS ONE-OF-A-KIND VSA SOFTWARE

TradeGuider Systems International's Innovative 4.0 Trading Software Now
Available to Everyone With New Lease Program

Chicago, Ill. (January 2010) – For the first time ever, TradeGuider Systems International (www.TradeGuider.com) is offering professional traders access to its innovative software for End-of-Day and Real-Time 4.0 on a lease plan. This new program is also ideal for individuals who want to learn more about trading using the Volume Spread Analysis™.

Throughout the world a growing community of traders and investors are embracing a methodology that “lifts the fog” on international markets. The methodology of Volume Spread Analysis™ (VSA) has gained real momentum in the last 10 years as traders and investors learn to read, track and predict market order flow for success. TradeGuider Systems International is the only company in the world to own the exclusive rights to the VSA methodology, and to create an ongoing educational and support system for traders and investors.

"As interest in VSA has increased over the last few years, we're seeing more and more beginning traders coming into the market and looking for affordable options for software and education," said Gavin Holmes, CEO, TradeGuider Systems International. "This unique lease plan allows everyone the opportunity to see why and how the VSA methodology works, allowing individuals to trade alongside the "smart money".

About the Program

The TradeGuider lease program is a monthly or quarterly plan that includes the rare opportunity to receive and participate in an expert-led education program with a three month membership to the exclusive VSA Club and access to TradeGuider's distinctive "Getting Started Course". Data feeds are not included. The End-of-Day 4.0 monthly lease is \$195.00 and \$395.00 per quarter and Real-Time 4.0 is \$295.00 per month or \$795.00 per quarter.

The TradeGuider Real-Time Version 4.0 has greatly refined and improved the Volume Spread Analysis™ (VSA) methodology set by the TradeGuider team of VSA experts, all trained by veteran VSA trader Tom Williams. Each signal now appears on the bar as it closes and the information boxes for each signal gives the trader or investor very specific information regarding the background, trade set-up, and market direction.

Stocks & Commodities magazine once called TradeGuider signals “the best ever seen”. The recent release of TradeGuider 4.0 is noteworthy because of the signal enhancements (making them even better), incredible new technology and information it provides traders, including;

- Complete overhaul of rules sets and signals - the first in 20 years
- New Diamond trending system
- Multiple monitor support
- VSA-centric tick charts
- Point and Figure charts
- Trade setup indicator sets
- Trade setup scanner
- Further compatibility with third party data-feeds
- Complete overhaul and refinement of educational dialogue boxes
- Plus a host of updates and refinements

"Compared to the cost of buying the software outright, this lease program is ideal for trying out TradeGuider and VSA, and really learning it before making the considerable, but worthwhile, investment," says Holmes.

“Since inventing Volume Spread Analysis I could never fully see the potential for serious traders and investors until TradeGuider launched,” said Tom Williams. “The company's uniqueness is unmatched along with its ability to encourage individuals to learn, understand and use VSA more efficiently.”

About VSA Club

The Volume Spread Analysis Club (VSA Club) was launched in June 2009 by TradeGuider Systems International as an online community for serious traders and investors to interact and learn from one another. For \$149 a month members receive significant benefits and direct access to some of the top experts in VSA today. The exclusive VSA Club is dedicated to growing and developing the VSA methodology and spreading its benefits.

About TradeGuider Systems International

TradeGuider Systems is a company devoted to providing software and supportive educational series of seminars and webinars to help traders and investors of every level learn to better follow and predict market manipulation. Its one-of-a-kind premier software trading analysis platform and methodology is based on the principles of Volume Spread Analysis™ (VSA) researched and developed by veteran trader, Tom Williams. VSA builds on the pioneering work of Richard D. Wyckoff, a famous 1920's trader who based his trading decisions on supply and demand and how they are directly linked to professional activity, "smart money" trading. TradeGuider Systems International is a global operation with offices in London, Chicago, Kuala Lumpur and Sydney. For more information about TradeGuider Systems International visit www.tradeguider.com.
